EDUCATION

Sancta Maria International School **Hyderabad, India**
Secondary Education 2021 – 2023

- A-Levels: Further Mathematics, Mathematics, Economics, Computer Science, International Project Qualification (Consumer consideration influenced by digital marketing channels (motion picture))
- Head Delegate for MUNs (2020-2024), Founder and Leader of Economics Society (2021-2023), Organising Committee for SMISMUN (USG Policy (2021) and Director General (2022))

Queen Mary University of London **London, UK**
2023 – 2026
Bachelor of Science: Mathematics with Management

- Grade: First Class
- Relevant Modules in 2nd Year: Probability and Statistics 2, Statistical Modelling 1, Statistics for Insurance, Linear programming and Games, Differential Equations, Applied Linear Algebra
- 3rd Year Modules include Bayesian Statistical Methods, Statistical Modelling 2, Financial Mathematics 1, Introduction to Machine Learning, Mathematical tools for Asset Management, Time Series (Developed time series model for gold prices under R and Meta Prophet)
- Course Representative (2024-Present)
- Volunteer
  - Mathematics Tutor for secondary school students at Team Up (Non-Profit)
  - Student Consultancy project: Worked with the Erbs Palsy Group to help analyse gaps in existing research and curate effective stakeholder engagement plans to help increase awareness and improve the reach of the non-profit.

Certifications and Achievements:

Chartered Institute for Securities & Investment (CISI) endorsed Career26 Asset Management Fundamentals Course

- Gained knowledge on:
  - How the asset management industry operates
  - The role of asset classes like equities, bonds, FX, and derivatives
  - Fundamentals of risk management.
  - Approaches to both technical and fundamental analysis
  - Portfolio construction and alternative investment strategies.

Bloomberg Market Concepts

- Analysed the impact of key macroeconomic indicators (GDP, inflation, employment data) on asset prices and investment decisions
- Applied equity valuation techniques using Bloomberg functions (FA, WEI, EQS) to evaluate real-time company performance
- Explored fixed income and FX markets, assessing how central bank policies influence yields and currency movements

Forage: Goldman Saches Risk Virtual Internship

- Gained foundational understanding of risk assessment principles in finance
- Identified and analysed various types of financial risk and their impact on decision-making
- Applied basic risk management tools and techniques to real-life scenarios
- Developed and proposed simple risk-mitigation strategies based on scenario analysis
- Connected core financial risk concepts to everyday decision-making and real-world financial contexts

British Society of History of Mathematics
Undergraduate Essay Prize Runner-Up

- From Dice to Derivatives: How 17th-Century Gambling Shaped Modern Financial Mathematics

WORK EXPERIENCE

Professor Lei Fang, Queen Mary University of London **London, UK**
Research Assistant June 2025 –Present

- Gained knowledge on how qualitative research is conducted and the techniques of academic writing
- Aid in the editing of academic research papers and referencing
- Aid the Professor to shortlist keywords and quotes from papers in the various databases

- Use Python to Web Crawl and retrieve relevant data for analysis

School of Mathematical Sciences, Queen Mary University of London — **London, UK**
October 2023- Present
Mathematics Ambassador

- Aid the School of Mathematical Sciences in events, like Women in Mathematics, Open Days, Offer Holder Days, other academic webinars and conferences with administrative support, registration and data collection
- Give presentations and talks in events and seminars to various audiences like academics, potential students, and other stakeholders.
- Help the university conduct mathematics workshops for high school students, as guides by helping them with problem-solving and critical thinking

Sancta Maria International School — **Hyderabad, India**
Teacher's Assistant for A and AS level Economics and Mathematics — March 2023- April- 2023

- Create study plans and recorded class logs to keep track of progress
- Find and create resources to utilise in teaching such as worksheets, activities and case studies
- Aid the teacher to conduct classes and exercises in class to improve the students understanding of the concepts

EXTRACURRICULAR ACTIVITIES

Team Up- Volunteer Tutor Mathematics — **London, UK**
Tutor Mathematics KS4 Students (Year10-Year11) — November 2025 – Present

- Program length- 1 weekly session for 4 months
- Teach according to pupils' knowledge level and improve the overall understanding of the concepts
- Fill post-lesson feedback every week and plan lessons relative to the progress of the pupils
- Conduct tests post each topic taught and mark the pupils' work

Queen Mary University of London — **London, UK**
Mathematics Society- Treasurer — September 2024 – July 2026

- Log all financial information of the Society's activities such as withdrawals and revenue
- Make budget plans and optimise costs for events such as the ice-skating event (76% increase in ticket sales compared to the prior year)
- Apply for grant funding from the student union to improve the society's events and working
- Help with the weekly academic seminars held by the school of mathematical sciences.

Queen Mary University of London — **London, UK**
Banking and Finance Society- Director of Communications — September 2024 – July 2025

- Head and facilitate the communication of the committee and members effectively to ensure committee coordination is effective
- Manage a team of ambassadors helping with the communications within the society and track the progress of the society's reach (Average weekly event attendance rate increased by 26%)
- Devise new innovative methods by using data- driven planning, to market and promote events to increase the reach of the society.
- Collaborate with the president, vice-president and other directors to provide the society with clear and impactful information on time
- Create engaging material for the society such as presentation slides for events, weekly newsletters, panel conference question lists, texts for marketing and more, using data insights from previous material and responses

SKILLS & INTERESTS

Languages:	English (Native), Hindi (Native), Spanish (Beginner)
Technical Skills:	Excel Python R.: Linear models, selection of variables, hypothesis testing. Time series Analysis including Triple Exponential Smoothing and ARIMA models. Deployment of case study using Meta's Prophet Time Series tool (see your GitHub page). Documentation production using RMarkdown SQL
Interests:	Badminton, Running, Hiking, Yoga, History of Maths, Volunteering, Cats, Tea, Checklists
